

RECORD OF SUBSTANCE OF INTERVIEW

Applicant's appointed representative, attorney Ari M. Bai, had a first interview with Examiner Kyle Stork by telephone on December 2, 2009 at 10:00 am Central Time for approximately 30 minutes and second interview by telephone on December 9, 2009 at 3:00 pm Central Time for approximately 20 minutes.

During the first interview, the Examiner agreed with the argument made by the Applicant's representative that the cited Pettersen reference did not teach or suggest the claimed invention. However, during that interview the Examiner cited a new reference, an article entitled "Web Page Filtering and Re-Authoring for Mobile Users" authored by Timothy Bickmore et al. (August 18, 1998), as disclosing the claimed invention. During the second interview, the Examiner tentatively agreed with the arguments made by the Applicant's representative for distinguishing the Bickmore article from the claimed invention. However, the Examiner wanted to review these arguments in writing before making a final decision regarding patentability. Accordingly, the Applicant has memorialized the arguments herewith in the remarks section of the response to the Examiner's Office Action.

This record is believed to comply with MPEP §713.04 and 37 CFR §1.133. Applicant encourages the Examiner to contact the undersigned attorney if this record needs to be modified or further supplemented.
